

MonitorPro

Environmental Data Management for Australian Mining Companies

Mining in Australia is a significant primary industry and contributor to the Australian economy. It has a long history dating back to the early colonies of the 1840s. Australia is a significant global producer and exporter of Iron Ore, Nickel, Aluminum, Gold Silver and precious stones such as Opal and Diamond.

Industry Leader

EHS Data and its MonitorPro Environmental Data Management Systems have been used by mining and metal companies in Australia since 2002.

During that time continuous development and additions to the suite of products and services has created an industry leading solution for environmental professionals.

The MonitorPro community in the area has grown to around 25 companies involved in the mining and metals industry and is actively used at around 60 individual working mine sites.

Over this time EHS Data has gained significant insight into the demands placed upon these organisations in managing their environmental obligations, enabling us to offer a complete and tailored service to the industry.

Helping Clients Meet Their Environmental Objectives

With flexible solutions developed around the demands of mining professionals in Australia we'll have a solution right for you.

Over the years we've worked on many projects saving clients time, saving them money, simplifying their reporting and providing solutions to keep their data secure and defensible.

Projects include providing solutions to comply with National or State based reporting such as:

- National Pollution Inventory (NPI)
- Load Based Licencing (LBL)
- National Greenhouse and Energy Reporting (NGER)

Some of the Companies we Already Work With

Based in Kalgoorlie, Western Australia, The Super Pit produces up to 850,000 ounces of gold every year and its operation far outweighs any other mining center in Australia. They have used MonitorPro since 2007 to manage their environmental obligations, minimising impact on the adjacent mining town of kalgoorlie.

St Barbara is an Australian based, ASX listed gold producer and explorer. St Barbara's assets include the Leonora operations in Western Australia, the Simberi mine in Papua New Guinea and the Gold Ridge mine in the Solomon Islands.

AngloGold Ashanti is a global gold mining and exploration company with a diverse portfolio of mining operations and projects on four continents.

A major producer of zircon globally and the largest producer of the high-grade titanium dioxide products of rutile and synthetic rutile, with operations in Australia and Virginia, USA.

MMG Limited is a global resources company which explores, develops and mines base metal deposits around the world. MonitorPro is used at sites across Australia and beyond to securely manage the company's environmental data.

Newmont Mining Corporation is primarily a gold producer, with significant assets or operations in the United States, Australia, Peru, Indonesia, Ghana, New Zealand and Mexico.

#1 Globally in the Mining Industry
