

MonitorPro

#1 Globally in the Mining Industry

Canada has a long and interesting history in mining dating back about 40,000 years, where the first Aboriginal Inhabitants used minerals to produce tools. Now it's a major producer and exporter of Coal, Copper, Gold, Iron, Nickel, Oil Sands and Diamonds.

MonitorPro is the Industry Leader

Environmental demands in the region means large volumes of data needs to be collected and reported upon to ensure compliance with requirements.

MonitorPro Environmental Data Management Systems have been used by Mining companies in Canada since 2009. During that time continuous development and additions to the suite of products and services has created an industry leading solution for environmental professionals. Subsequently EHS Data and MonitorPro has gained significant insight into the demands placed upon these organisations in managing their environmental obligations, enabling us to offer a complete and tailored service to the industry.

Some of Our Clients In Canada

The Imperial Metals Corporation is an exploration, mine development and operating company based in Vancouver, British Columbia. Its expertise and focus is on base and precious metals.

Walter Energy is a leading producer and exporter of metallurgical coal for the global steel industry with strategic access to high-growth steel markets in Asia, South America and Europe.

First Quantum Minerals Ltd. is an established and rapidly growing mining and metals company operating seven mines and developing five projects worldwide. The Inmet Mining operations purchased by First Quantum have been using MonitorPro since 2009.

Dominion Diamond Corporation is a Canadian diamond mining company with ownership interests in two of the world's highest rock value diamond mines. Both the Ekati and Diavik mines use MonitorPro to help manage their environmental obligations.

Helping Clients Meet Their Environmental Objectives

With flexible solutions developed around the demands of mining professionals around the world and in Canada we'll have a solution right for you. Over the years we've worked on many projects saving clients time, saving them money, simplifying their reporting and providing solutions to keep their data secure and defensible. Projects include developing an export to work directly with the British Columbian Environment Monitoring System (EMS), as well as creating internal stakeholder reports for a number of clients.
