Monitor-Pro Enterprise

Monitor-Pro Enterprise is a powerful and flexible suite of applications for managing any routine monitoring data lifecycles, from planning through to validation, interpretation and reporting.

The Monitor-Pro Enterprise suite consists of a browser application, installed client programme for administrators, smartphone/tablet modules and a full set of server based automation tools including:

Return on Investment (ROI)

All of our solutions have demonstrated a significant ROI within a rapid timeframe. Furthermore costs are dramatically reduced due to lower data management and report preparation times.

Compliance & Defensibility

Provides clear, consistent and validated reporting to regulators and other stakeholders reducing the risk of prosecution whilst increasing productivity.

Obligations and Policies

Provides a complete integrated management system from raw monitoring data all the way through the management of obligations and company policies.

Simplicity

Enables data from many sources to be drawn together and managed coherently. Our systems are managed professionally through a constant in-house development program that aims to incorporate the requirements of our user base at all opportunities.
