

MonitorPro

Express

The perfect way to
experience the potential of
MonitorPro on your terms

MonitorPro Express

A perfect way to experience the potential of MonitorPro on your terms.

Easy To Use

MonitorPro Express is designed for ease of use, providing key functionality with little or no training and no installation needed. All functionality is accessible through a single, tabulated, browser based interface.

User Dashboard

Each user in MonitorPro Express can build their own dashboard, with common graphs they wish to see on a regular basis, all in one place.

Graphing

MonitorPro Express has a built-in graph generating system, which can plot data points for your selections. Choose from different formats and visual appearance. Quickly add to your personal dashboard with one button.

Mapping

MonitorPro Express comes with a 'Mapping' function as standard. From here you can view your chosen selection either in Google Maps, or download it to view in Google Earth if you have it installed.

Internationalisation

MonitorPro Express adapts to a global market place allowing users to select any language they wish. There is also the ability to manage application translation and database object names.
