

# Report Template Design Services

EHS Data Ltd  
September 2020

## Report Template Design Services

EHS Data fully integrates consulting and software and offers a full service to create your system and keep it running smoothly.

### Your Design, Your Style, Your Reports

No two sites, geographies or industries are the same regarding their reporting requirements, from regulatory to internal reports. Often these reports contain tens, even hundreds of charts, tables and graphs.

Creating these reports manually can be labour intensive and subject to human error. MonitorPro reports can be provided which automates this process and can produce accurate, correctly formatted reports in seconds.

### Our Report Specialists

EHS Data have specialist report development consultants to assist with providing the report templates and other specific data outputs required. Outputs can be in a variety of formats, from pdf to MS word, auto-generated web pages, MS excel and more.

EHS Data design the template and when run, it will populate itself with live data from your core database. We can alter the design as your requirements change, but also provide the template, so you can edit as needed.

“As reports can be directly downloaded from the database, this means there is very little effort required to collate the routine data submissions to the appropriate authorities, including the EA. The graphing function can also aid greatly with understanding trends when assessing control/trigger level exceedances or writing Annual interpretative reports.”

**EHS Data Landfill Client**

The following reports are examples of outputs direct from MonitorPro. Reports can be viewed either in the browser, or as a PDF or Word Document.

\*report examples are demonstration only

“ I can now collate data from any database that I have access to, report it in any way I like, and schedule said reports, text alerts and compliance breaches etc. to anybody I like as often as I like. In fact I’m at a loss how to fill my time!

## Our Team

The technical strength of our company is at the heart of our business. Our team have been recruited from not only from software, but also from environmental and technical backgrounds, and all have a long track record of using, administering and developing environmental and sustainability data management software.

Our developers are experienced in the specific fields of EHS data management, from waste management to contaminated land, mining and general industrial site monitoring. This enables the company to develop highly relevant solutions and quickly understand our clients' specific requirements.

# Why choose EHS Data?

①

## Global Reach

EHS Data has over 20 years of providing environmental data management to organisations worldwide. MonitorPro is used at more than 1,000 sites in 40 different countries, from single-site installation to large multi-site corporate applications.

②

## Flexibility

EHS Data develop environmental data management systems. These highly configurable solutions are tailored to meet a range of specific requirements of clients operations. Our entire development team is based in Newark, UK.

③

## Trust & Credibility

EHS Data have worked with different organisations from Mining to Local Authorities to Energy Providers, large & small. Our industry knowledge is vast and our experience allows us to offer the best possible solution for all of our clients.

EHS Data is pleased to announce our MonitorPro MCerts certification has been renewed until 23rd February 2024. We are proud that MonitorPro was the first complete environmental data management solution to attain this standard.
