MonitorPro

High quality training to help you make the most of MonitorPro

EHS Data offers a variety of training programmes from beginner to advanced to refresh skills, on-site, at our offices or short online courses.

Training Options

Introductory Session (approx 8hrs)

This is a basic introduction into the concepts of using MonitorPro. You will learn how to use the dashboard and how to use the different tools and features of the system.

Intermediate Session (typically 16hrs)

This training session gives MonitorPro users a more in-depth look into MonitorPro.
Discover how to set up permits and reports along with advanced features and tools of the system.

Administrater Session (approx 8hrs)

This session is designed to train MonitorPro users in the administration area of the system. They learn how to set templates, imports, reports, add users and much more.

MonitorProWeb Session (typically 4hrs)

This gives users the information required to effectively navigate MonitorPro Web, and to understand the interface and the key concepts.

Bespoke Courses

We routinely provide clients bespoke courses tailored to suit their specific requirements. Our implementation consultants are never far from your part of the world, regularly travelling to clients to provide training and other services. More information can be find on our website via the MonitorPro training pages.

Additional Services

Additional services can be offered as part of a training visit or to complete a specific task/project. Our implementation consultants can help with services such as automation of data entry including setup of database importers, data cleansing tasks and legacy data transfer. Scoping of new data streams and offering advice on d offering advice on database creation and configuration.

Quality Assured

All MonitorPro training sessions are assessed, and a training certificate will be provided on successful completion of the training. Successful completion of the Administrator courses will require the attendees to practically demonstrate a number of the skills learned in the session. Feedback is always sought to continuously improve our services and products.

" The MonitorPro training session was very helpful and I was extremely satisfied with the service. The overall training was a good basis to understand how to use MonitorPro since not being exposed to it before.

Our Team

The technical strength of our company is at the heart of our business. Our team have been recruited from not only from software, but also from environmental and technical backgrounds, and all have a long track record of using, administering and developing environmental and sustainability data management software. Our developers are experienced in the specific fields of EHS data management, from waste management to contaminated land, mining and general industrial site monitoring. This enables the company to develop highly relevant solutions and quickly understand our clients' specific requirements.

Online, on-site or at our offices, our training services are provided by highly experienced staff.

Why choose EHS Data?

① Global Reach

EHS Data has over 20 years of providing environmental data management to organisations worldwide. MonitorPro is used at more than 1,000 sites in 40 different countries, from single-site installation to large multi-site corporate applications.

② Flexibility

EHS Data develop environmental data management systems. These highly configurable solutions are tailored to meet a range of specific requirements of clients operations. Our entire development team is based in Newark, UK.

③ Trust & Credibility

EHS Data have worked with different organisations from Mining to Local Authorities to Energy Providers, large & small. Our industry knowledge all is vast and our experience allows us to offer the best possible solution for our clients.

EHS Data is pleased to announce our MonitorPro MCerts certification has been renewed until 23rd February 2024. We are proud that MonitorPro was the first complete environmental data management solution to attain this standard.
