Benefits of EHS Data hosting a MonitorPro System

Experience of Hosting MonitorPro

There are many aspects to the hosting of a MonitorPro system, it is not simple IT. Knowledge of how all the components interact is needed, from SQL Server, to the Web Server, our MonitorPro server components, and the software and hardware requirements of them.

Fastest Updates

We will update your systems to newer usually faster than a third party would. Our hosted clients receive updates as they are ready, without having to schedule updates via an IT provider.

No Middle Man

Directly managing a hosted MonitorPro system keeps things simple. No middle man means no permissions issues, or back and forth between the client, IT and our technicians.

Guaranteed Access

Of course we have direct access with full permissions to the servers which we administer for our clients.

Best Server Administration

We have specialised routine server checks, built up over years of hosting. A third party could not offer this.

Fastest Response

Having direct access means we can provide the fastest response to any issues which may arise.

EHS Data is pleased to announce our MonitorPro MCerts certification has been renewed until 23rd February 2024. We are proud that MonitorPro was the first complete environmental data management solution to attain this standard.

Cost to Upgrade

It is usual practice for 3rd party or contract IT service providers to apply a charge, sometimes considerable, every time a system is updated.

This is included with MonitorPro hosting – whether a minor patch or a major update, they are simply done, no extra charge.

Why choose EHS Data?

①

Technical Strength

Our team evolved from technical and environmental backgrounds with a variety of knowledge. This includes the application, the management, the creation and the growth of intelligent environmental data management tools.

②

Flexibility

EHS Data develop environmental data management systems. These highly configurable solutions are tailored to meet a range of specific requirements of clients operations. Our entire development team is based in Nottinghamshire, United Kingdom.

③

Trust & Credibility

EHS Data have worked with different organisations from Mining to Local Authorities to Energy Providers, large & small. Our industry knowledge is vast, and our experience allows us to offer the best possible solution for our clients.

How does it work?

Every site is different in their volumes of data and reporting requirements. EHS Data employ a range of highly skilled staff, not only from an IT background but also from an environmental

management background. You can be assured that time and the upmost care is taken over managing your environmental data by experienced and knowledgeable professionals.

“ We have recently switched to the EHS hosting platform which is far more superior to our previous internal hosting solution. Our team have already reported significant performance gains, especially in the operating speed.
