

EHS Data

EHS Data is the global leader in providing an easy-to-use and efficient solution to manage all environmental and compliance data in one centralised platform. Say goodbye to uncontrolled spreadsheets and manage your environmental data in a modern, flexible software interface.

Our Approach

EHS Data fully integrates software and configuration consultancy to offer a full service to create your system and keep it running smoothly.

We work to your requirements

A dedicated implementation consultant will work with you to deliver services which include database creation, legacy data transfers and custom report design, plus on-site or online training. We then offer a variety of ongoing support and data processing services.

We pride ourselves in outstanding quality of support, which ranges from helpdesk to system upgrades, maintenance and administration, plus system hosting options.

Environmental Principles

The main objective of **EHS Data** is to help the environment, and we take the environment and our own sustainability very seriously. This passion is reflected in our internal ethos, and we have been carbon negative since 2022 and carbon neutral for several years prior.

EHS Data develop systems which are highly configurable by the end users, giving you complete control. If, however you need custom development all our expertise is in-house, with our entire development team based in the UK. From development through project management to software support we have all the expertise under one roof. We strongly believe in producing high quality systems, which is why our solutions are certified to the rigorous MCERTS quality standard by the English Environment Agency.

Technical Strength

The technical strength of our company is at the heart of our business. Our team have been recruited from not only in IT but also from environmental and technical backgrounds, and all have a long track record of using, administering and developing Environmental and Sustainability Data Management Software. Our developers are experienced in the specific fields of EHS data management, from waste management to contaminated land, mining and general industrial site monitoring. This enables the company to develop highly relevant solutions and quickly understand our clients' needs.

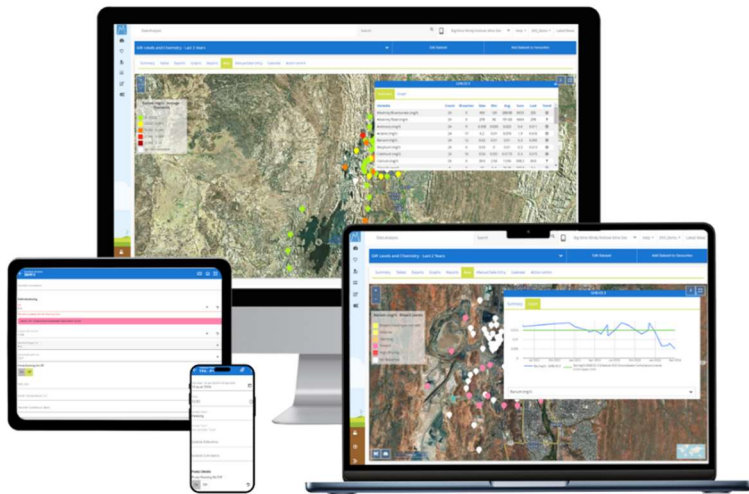

Secure and Certified

EHS data takes cyber security seriously, and to demonstrate our commitment to this, we have attained both ISO 27001 Certified and Cyber Essentials Certified.

About EHS Data

With over 25 years' experience providing EHS Data management systems, **EHS Data** has firmly established itself as a leader in its field helping organisations manage their environmental obligations and sustainability whilst saving time and money. **MonitorPro** products are used at more than 1,000 sites in over 30 countries worldwide, from single site installations to large multi-site corporate applications. This is why many large corporations have chosen **EHS Data** as their data management solutions provider.

Comprehensive Features

Analyse, trend, manipulate and report across all data, confident it's secure, auditable and defensible to regulators and stakeholders. Never miss a breach or non-conformity, whether it be notification via email or scheduled report. All your data is validated and reviewed against a highly flexible compliance system, whether it be permit, internal or statistically calculated limits. Planning and scheduling of reporting and data collection requirements with notifications and seamless integration with data collection.

Environmental Compliance

Our solutions are designed to enable users to professionally manage their diverse environmental compliance data in one solution.

Experience and Expertise

Join a network of current users already benefitting from the power and flexibility of our solutions across a variety of industries and geographies. Assured you can remain compliant with your internal and external obligations. With extensive experience and expertise, we'll likely have already provided a solution in your country or industry. Whether it be a large complex industrial process in Australia, a contaminated land site in the UK, a mine site in the USA or elsewhere in the world, our solutions are flexible and intuitive enough to suit them all.

One solution for environmental compliance

- ✓ Obligations and policy tracking.
- ✓ Integration and seamless input of a range of data.
- ✓ Scheduling and task tracking.
- ✓ Integrated field data capture.
- ✓ Flexible compliance validation.
- ✓ Automated calculation and conversion of data.
- ✓ Comprehensive suite of interpretation tools.
- ✓ Customisable compliance and performance reporting.

"Thanks for your efforts on developing MonitorPro to what we want. The guys here are absolutely convinced of its value - and looking forward to taking it to the next stage with the interface. A large part of this is the service and attention you have given us. I really appreciate this and thank you for it."

EHS Data Client

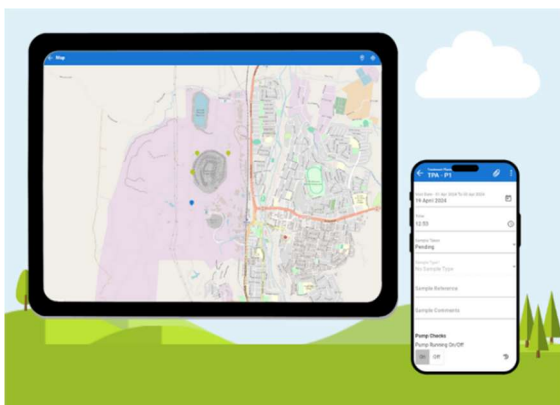

Obligations management

Managers can immediately see compliance against obligations at a high level while administrators and technicians can review and manage compliance at a point-by-point level.

Flexible solutions

Our solutions can look after the data from a large variety of sources. The solution is flexible enough to handle all types of monitoring data, calculations and reporting at a local, regional or organisational level.

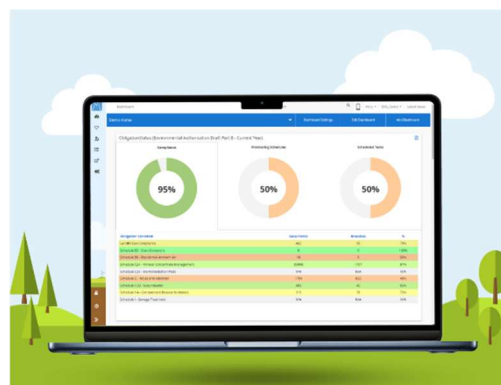

Bringing data together

With multiple data types, monitoring programmes, sources of data and reporting requirements, managing sustainability data can be onerous, especially when multiplied across many locations and geographies.

Sustainable solution

- ✓ Highly flexible integration with many systems such as SAP and PI.
- ✓ Carbon footprint- Import and enter all energy data, e.g. diesel, oil, gas, electricity to automatically generate CO2 equivalent totals by location, aggregate them to report by site, region or organisation.
- ✓ Water and energy balances aid in targeting losses.
- ✓ Record waste arising by type, and track trends in volumes recycled or landfilled.
- ✓ Integrate with business data to automatically create KPIs for energy, waste or water use per person, department or site, or per tonne of production.
- ✓ Comprehensive reports assist with identification of trends and performance against targets.

"I've found that one of the best features is the compliance breach automated emails. There is something very reassuring in knowing that as soon as data makes it into MonitorPro (which can obviously be very rapid with auto importer) you will be notified of any issues without having to go through all the data looking for problems."

EHS Data Client

Designed to Manage Energy Data

- Manage all types of energy data, including electric, gas, transport fuel, gas oil, LPG, renewable energy and more.
- Automated calculations for carbon conversion factors.
- Create and review the organisation's carbon footprint.
- Set targets based on CRC, CCLA or continuous improvement (using historical data to auto-calculate reduction targets).
- Automatic importing of all half hourly (HH) and other frequency data, from sub meters, data loggers, historians and other sources.
- Review accurate costs based on tariff rates.
- Calculate usage during specific times of a day.

Company History

EHS Data began in the mid-nineties as a team of Geo-environmental Consultants struggled to manage environmental data using spreadsheets and home-made software systems. Fuelled by the desire to simplify this process, the first software tool was developed in 1996 and **MonitorPro** was born.

The company grew rapidly and **MonitorPro** quickly became the tool of choice in the UK Waste Management Industry. Since then, we have been expanding our global reach, with over 200 clients worldwide and implementations at over 1,000 sites. These range from single site operations to global organisations, in several industries throughout the world.

Today, **EHS Data** is a world leader in developing and implementing environmental data management systems to save time, improve planning, quality, analysis, awareness, and reporting.

"EHS Data are always driving to deliver exceptional service and products to our clients, and it's a pleasure to be part of such a team, who all share a passion for innovative technology that benefits the environment."

Matt Silk – EHS Data, General Manager

Our Values

Team Spirit

We're a team of energetic, talented professionals who thrive in fast paced and innovative environments. We work hard to deliver total client satisfaction.

Professional Development

Our team of experienced and dedicated specialists work closely with you to guide you throughout the implementation process and beyond.

Honesty and Integrity

We believe in being entirely honest with everyone we deal with, whether a customer, an employee or a supplier.

Environmental Principles

Our continued effort to help the environment includes: a paper-less office, offering web-based training and online product demos, and when using CO₂ we pay the equivalent for planting & sustaining woodland.

Sustainability

Here at **EHS Data** we take responsibility for our businesses' impact on the environment, achieving carbon negative status in 2020, and were carbon neutral prior to that.

Client Support

Our clients are at the heart of everything we do, and we are committed to offering exceptional client support. As a result, our client feedback score is 6.8 out of 7, compared to an industry average of 5.4.

Why Choose EHS Data?

Technical Strength

Our experienced team comes from technical and environmental backgrounds with a long track record of using, administering, and developing Environmental and Sustainability Data Management Software

Flexibility

MonitorPro is highly configurable and customisable by the user, providing functionality that is designed to assist environmental professionals in data handling and reporting.

Trust & Credibility

EHS Data have worked with different organisations from Mining to Local Authorities to Energy Providers, large & small. Our industry knowledge is vast, and our experience allows us to offer the best possible solution for our clients
