

MonitorPro

One of the biggest challenges faced by responsible organisations is protecting the environment by reducing environmental impacts and meeting increased regulatory demands while saving on resources. **MonitorPro** has been developed to provide powerful features to help manage your environmental data in a single centralised location making it the perfect environmental management solution.

Powerful, Automated Environmental Accounting

MonitorPro is a comprehensive environmental accounting system, giving you peace of mind that you are fully compliant with environmental legislation, along with the ability to configure early warning systems with suggested actions in case of permit breaches.

Why Choose MonitorPro

By combining years of industry experience and client feedback **MonitorPro** has been developed to provide powerful features to help manage your environmental data, including:

- A user-friendly interface.
- Inherent flexibility.
- Accessibility.
- Internationalisation.
- Scalability.

These key features help clients fulfil environmental obligations quickly and, in turn, increase efficiency through improved data management, reporting, automation, and visualisation.

Automated Data Collection

Reduce the potential for human error and improve data quality by automating and scheduling your environmental data imports into a single point of entry. Real-time validation alerts users of any data errors or compliance controls.

Professional Data Visuals & Dashboards

Drive your environmental performance with **MonitorPro's** compelling and interactive graphical interface. Plan, manage and report strategic data easily and effortlessly.

Using the latest technology, **MonitorPro** delivers a comprehensive view of your environmental performance across all operations.

MonitorPro is a powerful tool kit for environmental professionals to best utilise their environmental data, reduce manual burden, and improve compliance. With flexibility and ease of use at its core, **MonitorPro** boasts a depth of functionality that is all designed to assist environmental professionals in improving data handling, compliance, analysis, and reporting.

SaaS with MonitorPro

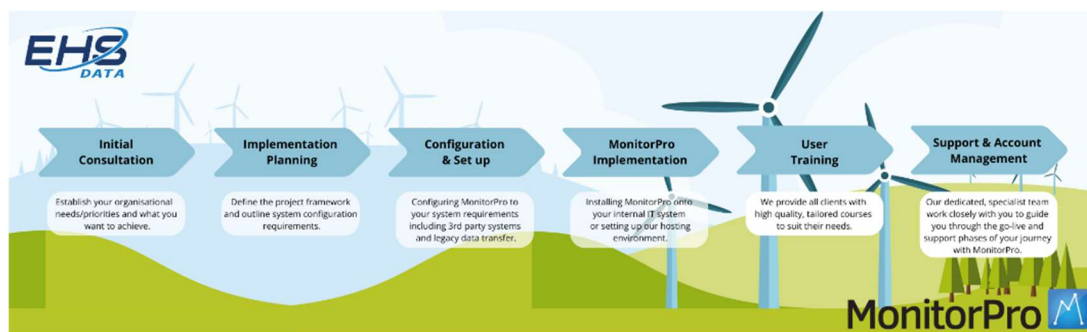

A hassle-free option to access **MonitorPro** through the internet at any time. The software is automatically updated which eliminates the need for costly internal hosting and administration, making it the perfect solution for successfully managing your environmental data.

Seamless Implementation with Our Experienced Team

Your organisation will be assigned a **MonitorPro** account manager to provide a seamless implementation. Thereafter their continual support and expertise will be available to ensure you get the most from your system.

MCERTS

MonitorPro is the first and only MCERTS Accredited complete Environmental Data Management solution. **MCERTS** not only assesses quality processes, such as ISO, but also goes as far as assessing **MonitorPro's** database structure and code. This means you can be sure that quality control is first and foremost with **MonitorPro**.

"After reviewing the market, we invested in MonitorPro due to the data automation engines, the multi-lingual browser interface and ease of use. We're well supported via our account manager".
