MonitorPro

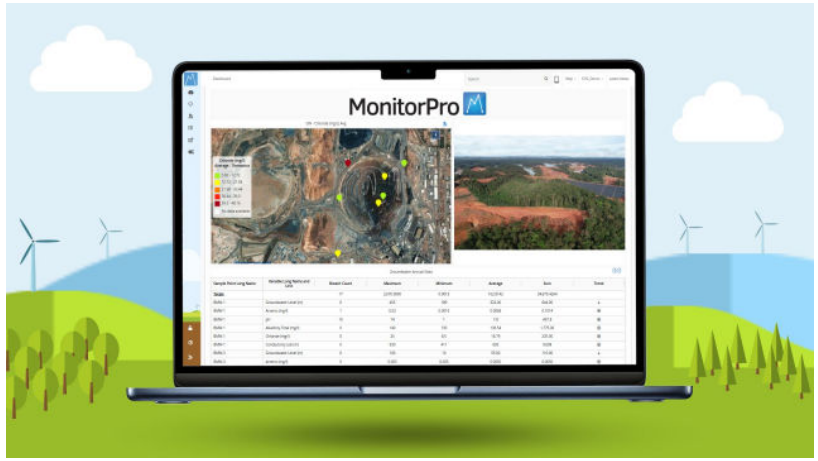
Dashboards

MonitorPro features a dynamic dashboard, enabling users to display a variety of different widgets in a centralised location. Several widget options can be utilised including:

- Reports.
- Mapping.
- Graphing.
- Tables.
- Photographs.

Dashboards can be printed as PDFs for wider sharing of content stored in **MonitorPro**.

These dashboards are a fast and simple way to view data and observe trends. Data can be included from different databases and multiple dashboards can be created depending upon reporting needs.



Key Advantages of MonitorPro Dashboards

Up to Date Data

Data is automatically refreshed, so data displayed is always the latest in the system.

Predefined date ranges can also be selected.

Data Sharing

Dashboards can be easily shared between users/groups. Ensuring simple and effective sharing of data.

Whole user groups can be responsible for a dashboard.

Easy Reporting

Dashboards are a powerful report building tool.

Reports and can customised to client/industry requirements through a dynamic dashboard. Displaying graphs, tables and maps, combined with images, titles and text.

Quickly View Data and Trends

Dashboards can be set as a user's homepage.

Quickly identify issues or breaches, with relevant users notified and steps taken to resolve the issue.

Multiple Widget Options

Dashboards can contain widgets from multiple databases, and a user can have multiple dashboards and move/copy widgets between them.

Obligations

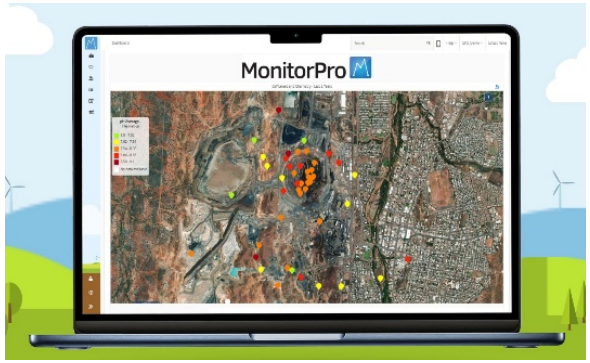
Obligation Widgets can be added to a Dashboard to give an overview of an Obligation's Status.

Graphing

Users can add a Pie, Bar, Combo, Wind Rose, or Line Graph including or excluding compliance limits.

Mapping

Maps can be added with formatting such as Breaches, Sample Point Groups, Sentinel, etc.



Tables

Allows users to display tabular output for data analysis and onward reporting.

Photographs

Images uploaded by **MP-Field**, imported via an Auto Importer, manually uploaded and associated with an Object, or via the Document Manager. These images can be static or dynamic.
